COMMISSIONING PLANS: EFFECTIVELY MANAGE THE PROCESS

Building on our expertise in the preparation and collation of O&M manuals, Dewick & Associates have recently been **providing Commissioning Plans** to several of our clients. Commissioning is a **crucial part of the construction phase** and when undertaken correctly, ensures that a **building operates efficiently**, producing **higher plant performance** and **lower running costs** as a result. Dewick & Associates can compile a Commissioning Plan for each of your projects, detailing and presenting the following in a report which can be provided to your commissioning technicians for use in the field:

- Project scope and systems installed
- Requirements of the commissioning process
- Commissioning procedures
- Detailed Inspection and Test Plans (ITPs)
- Commissioning Record Sheets

A Commissioning Plan **simplifies your onsite processes**, saving time and reducing the demands on your Project Managers, whilst providing **reassurance** the commissioning process is well detailed and documented.

Mechanical O&M Manual and Commissioning Sheets

*Scape Student Accommodation
Lincoln Square*

Electrical O&M Manual and Commissioning Plan

*Alice Springs Youth Justice Centre
Stage 1*

Mechanical O&M Manual

*Royal Australian Navy HMAS
Cerberus Training Facility*

Hosting and Pre-Population of Commissioning Test Record Sheets

Dewick & Associates can provide editable, pre-populated Commissioning Test Record Sheets for your technicians to use in the field. The documents are hosted on Dewick & Associates' server and are accessible via a single shared link. Your technicians can edit the document via the link to record the unique serial number and relative test information of each piece of equipment in real time. When commissioning is complete, each document can simply be converted to PDF format and inserted into associated handover materials.

Let us know if you have a project **Dewick & Associates** can assist with.
