# RAAF AMBERLEY DEFENCE

## APOLLO

### Project Introduction

RAAF Amberley Defence project included a new office building with administration area, operations control room, staff working facilities, meeting room, showers, lockers & change area, comms rooms, laundry area, safety store, kitchenette & car parking. It includes a single level commercial office of lightweight construction & will be raised on posts. Demolition of the existing buildings was also included.

### How D&A worked with Apollo:

The RAAF Amberley Defence project was provided with a detailed handover package from D&A including

- Pre-start meetings with the project team
- Accessible folder structure for Apollo to be able to review all HOTO documentation
- Full Operation & Maintenance handover package including (Architectural, HVAC, Electrical, ICT, Hydraulic & Fire)
- Metadata for all as installed drawings in line with the defence requirements

To ensure security was met, we implemented a restricted platform for the HOTO documentation & O&M Manuals created by D&A.

#### Project Highlights

- **Location:** Queensland
- **Discipline:** Architectural, HVAC, Electrical, ICT, Hydraulic & Fire
- **Principle Contractor:** Apollo
- **Industry Sector:** Defence
